

# SEAB LUNDY

## DevOps Engineer

### CONTACT

- 097 989 8365
- lundyseab@gmail.com
- Toul Pongro, Chaom Chau 1, Pur SenChey, Phnom Penh

### SKILLS

#### Cloud & Containers

- Kubernetes (K8s, K3s)
- Docker

#### CI/CD & GitOps

- Jenkins, GitHub Actions
- ArgoCD

#### Infrastructure & Automation

- Ansible
- HashiCorp Vault
- Linux

#### CNI & Service Mesh

- Cilium, Flannel
- Istio

#### DevSecOps

- SonarQube
- Trivy
- TruffleHog
- Dependency-Check

#### Networking

- MikroTik, UniFi
- VPN, DNS

#### Programming

- Python, Java
- Bash

### PROFILE

DevOps Engineer with hands-on experience designing and managing Kubernetes platforms, CI/CD pipelines, infrastructure automation, and DevSecOps. Skilled in Kubernetes, Jenkins, Argo CD, Ansible, HashiCorp Vault, Linux, and cloud-native technologies, with expertise in building secure, scalable, and highly available infrastructure. Experienced in server administration, enterprise networking, and setup AI operation workflow. Passionate about automation, platform engineering, and delivering reliable production systems.

### WORK EXPERIENCE

**Instructor, Server & Network Admin - Full Time** 2024 - PRESENT  
Korea Software HRD Center | Phnom Penh

#### DevOps Instructor | Automated PaaS Project (2024):

- Led the development of a Kubernetes-based Platform-as-a-Service (PaaS), achieving Top 3 Project recognition.
- Designed CI/CD pipelines from upload git repo's link to production ready using Jenkins, Kubernetes, ArgoCD to automate application deployment.
- Automated SSL/TLS certificate provisioning, domain configuration, and Kubernetes application deployment.
- Mentored the project in collaboration with a local banking partner, and guiding students through DevOps best practices.

#### Servers & Network Administration (Jul 2024 - Present)

- Designed and managed KSHRD's enterprise network using MikroTik routers and UniFi access points.
- Administered Linux servers hosting websites, internal services, VPNs, and Network File System (NFS).
- Maintained infrastructure reliability, system security, and service availability across the organization.
- Deployed and maintained production services supporting both administrative and technical departments.

#### Cybersecurity Instructor | Hunesion Collaboration (2025):

- Designed and delivered a cybersecurity training program focused on AI-assisted vulnerability assessment.
- Mentored students in integrating LLMs with SonarQube, Subfinder, and GoBuster to improve vulnerability detection, remediation suggestions, and payload generation.
- Collaborated with South Korean cybersecurity company Hunesion on course development and mentoring.

#### IT Support - Part-Time

NOV 2023 - MAR 2024

The University of Cambodia | Phnom Penh

- Responsible for setup computer operating system, network, and software installation.

## LANGUAGES

- Khmer (Native)
- English (Very Good)

## PROJECT

### Kubernetes AI cluster (K3S)

2026

Korea Software HRD Center | Phnom Penh

- Designed and deployed a lightweight Kubernetes cluster using K3s to support AI workloads, internal services, and cloud-native applications.
- Implemented Cilium CNI for container networking.
- Configured Istio Ambient Mesh to provide secure service-to-service communication, traffic management, and mutual TLS without traditional sidecar proxies.
- Implemented monitoring with Prometheus, Grafana, and ELK Stack.
- Applied DevOps and DevSecOps practices to improve infrastructure automation, security, scalability, and operational reliability.

## EDUCATION

### Bachelor of Information Technology

2020 - 2023

CoST | The University of Cambodia

**GPA:** 3.51 / 4.0

### High School Diploma

2018 - 2019

Preah Bat Norodom High School | PreyVeng
